[redacted]

Hello Dr. [redacted],

Would your practice consider accepting new patients through the 1Health.Care Alliance who prefer self-pay—including uninsured patients and those with insurance who choose to pay directly?

This idea was inspired by Dr. Murdock's self-pay model: `https://www.murdockhealth.com`. He was my physician when I lacked insurance. A $60 visit versus a comparable $200 out-of-pocket visit could save a patient $140, while allowing them to keep their existing provider. Self-pay expenses may not count toward insurance deductibles.

We're inviting founding practices to discuss agreed prices for selected services. Under our proposed model, rates would appear to signed-in FANSIAL 1Health.Care Network members when adding eligible services to their cart, rather than on a public price list. Patients would confirm prices and terms with your practice before treatment.

Our broader vision will develop as we expand the alliance through the FANSIAL Network into multiple cities. Your early input would be welcome.

Negotiated pricing is optional. Practices can also participate through healthcare podcasts, HealthCast.TV videos, event sponsorships, and role-based discovery.

Please turn over to explore the community integration model we've developed since 2018 with support from healthcare professionals, restaurants, and local businesses. A sponsorship application is included.

We also gather on the fourth Thursday of each month at Atithi Venue. I'd love to introduce you to our DFW talent and event organizer community.

Would you be open to a brief conversation?
